Reduce red eye, rotate, flip, crop, resize, and repair for full control over your finished product.

You've Been Framed!
Add a border, vignette, or text to your favorite photos. Customize the color, texture, and thickness to suit your shot. Blur or raise the edges, and add a drop shadow to perfectly complement the mood of your photo.

Direct the Eye
Use the Blur tool as a creative effect or noise reduction technique. Choose from a variety of blur styles — even achieve a bokeh effect.
