

## Screen Recording & Video Editing with Ease

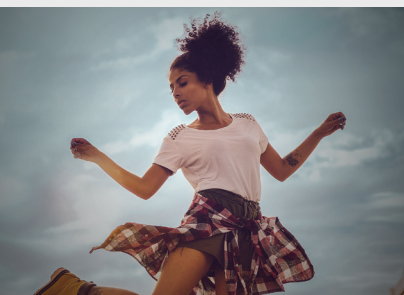

### Your world is Moving.

Enrapture your audience with the most versatile and accessible content creation tool in the space. Sporting sleek 64-bit performance, an easy-to-master interface, and 4K rendering, ACDSee Video Studio 4 empowers you to bring your vision to life. In addition to easy sharing solutions, ACDSee Video Studio's direct uploading to YouTube and Vimeo take the tedium out of distribution. Now with keyframing, green screen support, behaviors, overlays, non-destructive cropping, 3 axis rotation, support for HEIC files, freeze frames, GIF exporting, over 3x more keyboard shortcuts, and much more, ACDSee Video Studio 4 provides hassle-free video editing and screen recording without the learning curve.

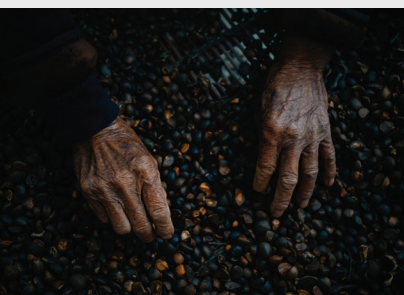

### Training & Support

Easily motivate and educate using video to simplify concepts, convey ideas, and enhance learning. Facial expressions and body language can encompass hours' worth of written explanation. Save your organization money by designing hands-off training videos for new hires. Create interpersonal connections by utilizing webcam and screen recording. Draw special attention to key pieces of information with captions, animations, overlays, freeze frames, audio effects, transitions, layering, and much more.

### Marketing & Branding

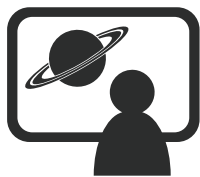

In today's evolving market of personal and business brands and fast-paced content creation, video is a necessary component of successful advertising. Connect with your target audience through promo videos, sneak peeks, trailers, commercials, video pitches, B2B presentations, featurettes, slideshows, and GIFs. Communicate your product, while putting a face to your name, brand, or organization with simultaneous webcam and screen recording. Create alluring videos designed to show your customers product highlights, defend your brand with watermarks, and subtitle for accessibility, all while inspiring your market.

### Education & Teaching

Everyone has a skill to share, and this has given rise to online education on skill sharing websites. Communicate your expertise without being a video expert yourself. Record engaging lessons, lectures, and presentations, effortlessly expanding beyond the limits of the classroom walls and into the realms of distance education. Combine video, audio, and still images with text, filters, animations, overlays, transitions, and audio effects to clearly convey your message, and then share your online course on social media or to YouTube or Vimeo directly from inside ACDSee Video Studio 4.

## Top-Features

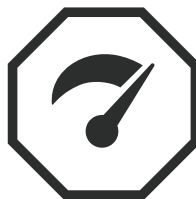

### Green Screen Support

Put your subject anywhere! Remove green screen, or the color of your choosing, and layer in other videos or still images to create your own background.

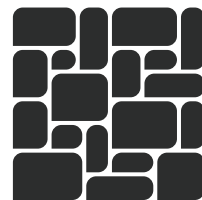

### Add Ambience

Color grade your shots by loading and applying an endless array of cinematic LUTs.

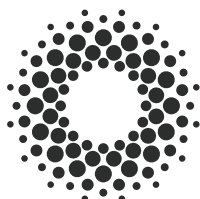

### Speed Limit

Take control over the speed and overall duration of your media.

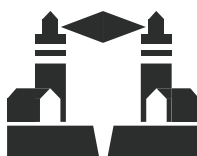

### Cover it Up

Blur out faces, license plates, or sensitive information with the customizable Mosaic tool.

### Express Yourself

Need some snow? A light leak? A count-down? Effortlessly add over 46 overlay effects on top of, before, or after your media.

### Customized Aesthetic

Get creative with 13 new filters allowing you to morph, emboss, mirror, shake, obscure, adjust, and much more.

### Capture the Moment

Extend the life of specific moments by creating freeze frames. Or snatch snapshots of your video's playback and add them to your available media.

### Export as a GIF

Quickly create GIFs from your videos or image series. With a recommended size for easy sharing, GIF generation has never been this painless.

### Keyframing

Shift your media's properties from one state to another with pre-made or custom animations!

### Make an Entrance

Perfect your video's style and movement with unique behaviors animating the entrances and exits of clips.
