

## Share your world at the speed of life

Do you want to slow your life for a learning curve, or do you want to record, edit, produce, and share at the speed of life? Luxea 6.0 is your ticket to living large.

### Clean and Easy Recording

- Free video recorder with versatile recording options for screen, webcam, microphone, or system audio.
- As simple as clicking a big red button, or as customizable as your vision requires.
- Uninhibited real-time MP4 creation with no watermarks and zero rendering time.

### Tailored Social Media Outputs

- No more watermarks for the duration of your project! Luxea adds a short intro and outro to files produced using the Free Plan.
- Easily create perfect posts by optimizing for YouTube and Vimeo using the newly redesigned Luxea Production Assistant.
- Conveniently preview your rendering progress and receive a sound reminder when rendering completes.

### Redesigned Production Assistant

Produce your work even faster with the redesigned Production Assistant and customizable output templates.

### Rendering Preview

Preview your project as it renders and receive a sound notification once it is finished.

### Real-time MP4 Creation

The recorder encodes as it captures video and audio, so you can go from recording to editing instantly.

### Mouse Click Effects

Add animation and sound to your mouse clicks while screen recording to help your audience follow along.

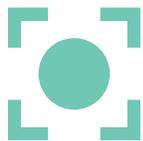

### More Recording Options

Control the duration and quality of your recording to suit your project needs.

### Single Input Recording

Capture audio without video and vice versa with the option to record from only one input at a time. your vision.

### Targeted Screen Recording

Select a window to screen record with a single mouse click.

### Improved Timeline Operation

Auto select after splitting a track or use a keyboard shortcut to jump forward/backward by one second for optimal Timeline performance.

### Timeline Markers

Alignment between tracks made easy with built-in snap-to-set-point functionality.

### Color LUT Opacity

Color grade your shots by loading and applying an endless array of cinematic LUTs. Easily control the strength using the opacity slider.
