

**CELEBRATING 30 YEARS OF ACDSEE SOFTWARE DEVELOPMENT!**

# Photo Studio

## Ultimate 2024

### AI-Powered File Management and Photo Editing

ACDSee Photo Studio Ultimate 2024 is the complete solution for photographers and creatives of all levels. The software comes fully loaded with new and improved features boosted by timesaving, local Artificial Intelligence (AI) to help you organize, search, and edit your photos with minimal effort and maximum control.

#### Layered Image Editing

Let your creativity soar with layers! Use images, text, shapes, AI-powered editing tools, layer masks, blend modes, and more to subtly enhance or drastically alter your photos, build artistic compositions, or create whatever layered magic you can imagine. Designed to isolate the subject or background in a single click, AI Actions allow immediate editing that rapidly takes your photos from uninteresting to unbelievable.

#### RAW Photo Editing

Intuitive and non-destructive RAW photo editing at your command. Making and managing selections is fast and efficient thanks to the new Masking panel in Develop Mode. Here you will find the familiar selection tools you know and love – Develop Brush, Linear Gradient, and Radial Gradient – plus new one-click, AI-driven selection tools – AI Subject, AI Background, and AI Sky – to make the complex selections you need. Tweak your selection masks at any time and use them to apply a variety of adjustments on select parts of your image. Tools such as Color and Tone Wheels, Light EQ™, Noise Reduction, and more give you the power to correct color, fix lighting, repair, and restore image quality, all without permanently altering the original image.

#### Digital Asset Management

Organizing, sorting, searching, and sharing—everything you need for complete mastery over your photography workflow is right here, at your fingertips. AI-driven Facial Recognition will find the faces in your photographs so you can name them, and then the software will immediately learn which names to put to which faces, saving you hours of tedious manual skimming. Add ratings, tags, categories, keywords, location data, customizable color labels, and other metadata to further organize your photos. Powerful search features like Advanced AND/OR Search, Quick Search, and dynamic Category & Keyword List filtering help you find exactly what you are looking for with little effort.

## What's New in Photo Studio Ultimate 2024?

Accomplish more while doing less, this year's release is packed with new and improved Artificial Intelligence (AI) features to make your life easier. Learn more about some of the new features below.

### AI Keywords

Have you ever been looking for that certain photo, one you know you have, but just can't find? Say goodbye to the hunt with zero-effort AI Keywords. Search and find photos faster than ever, cutting out the tedium of manually assigning keywords or hunting through thousands of photos for the perfect one. Make finding your latest trip to the beach as simple as searching "Beach", effortlessly find all of your pet photos, or bring together your culinary creations to share in an instant. Make every photo discoverable and give them the love they deserve with AI Keywords.

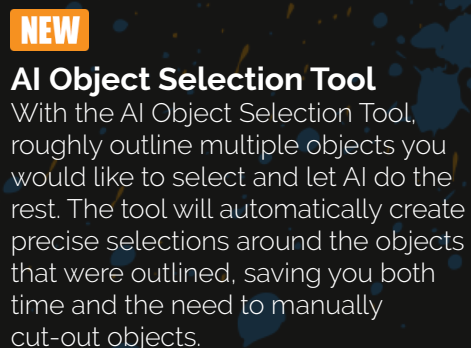

### AI Sky Replacement

The sky is no longer the limit with AI Sky Replacement. Easily define and replace the sky in any photo, resulting in a natural-looking composition thanks to foreground and reflection options for water. You can also use one of the many pre-installed skies, like Sunset, Storm, and Night Sky, to transform your wildest dreams into your horizon realities.

### Non-Destructive AI Masking

Save countless hours editing your images, including RAW files, using the new AI masking tools in Develop Mode. The redesigned Masking panel gives you new options to automatically mask the subject, background, or sky in your photos. The new panel also houses the classic brush, linear gradient, and radial gradient tools for efficient mask management. These masks allow you to easily edit specific parts of your photos, while preserving the original file, to truly bring out the best in your photos non-destructively.

### AI Object Selection Tool

With the AI Object Selection Tool, roughly outline multiple objects you would like to select and let AI do the rest. The tool will automatically create precise selections around the objects that were outlined, saving you both time and the need to manually cut-out objects.

### IMPROVED

### AI Face Edit

With the power of AI, detect faces and enhance facial features using highlight & contour, remove blemishes, whiten eyes & teeth, and more. With new features added for adjusting eye directions, skin smoothing, and glow, the latest improvements to AI Face Edit make retouching portraits with Ultimate 2024 more powerful – and more fun!

### IMPROVED

### Edit Brush

New options for Flow, Opacity, and Jitter will give you even greater control over your brushing. Flow sets the amount of effect on the brush per stroke, while Opacity sets the maximum amount of effect that will be visible. Jitter adds a touch of randomness to your brush, to produce a more organic result.

### NEW

### Two-Way Metadata Embedding

Simplify the process of migrating and sharing category and keyword metadata by seamlessly integrating your ACDSee metadata with IPTC and vice versa. Embed ACDSee Category and ACDSee Keyword metadata to your photos to share with friends and family. Import IPTC Keyword and Category data from received photos into ACDSee, ensuring seamless photo organization, regardless of their source.
